SUMMARY

Product-focused Software Engineer with 6+ years of experience building reliable, scalable web applications with React and modern technologies. Experienced across FinTech, Banking, Cryptocurrency, Blockchain, Real Estate, and Enterprise applications. Strong in translating business requirements into scalable solutions, improving user experiences, and reducing technical risk through close collaboration with Product Owners and engineering teams.

SKILLS

Software Development React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, Vite, Webpack, Scalable UI Architecture, Component-Based Architecture, Design Systems, Reusable Component Libraries, Custom Hooks, Redux, Redux Toolkit, Context API, TanStack Query, Material UI (MUI), REST APIs, Axios, API Integration, Authentication Flows, CI/CD, GitHub Actions, npm, Git, GitHub.
Programming Languages JavaScript, TypeScript.
Architectural Patterns Component-Based, Modular and Clean Architecture.
Development Tools VS Code, Cursor.
Testing Test-Driven Development (TDD), Jest, React Testing Library (RTL), Unit, Integration, End-to-End Testing.
Backend & Database Node.js, Express.js, MongoDB, Mongoose.
UI & Design User Interface Design, Material UI, Kendo UI, Design Systems, Responsive Web Design.
Design Principles Solid Principles.
Soft Skills Leadership, Troubleshooting, Customer Satisfaction, Technical Debt Awareness.

EXPERIENCE

Frontend Developer Oct '24 — May '25
Cashgate Information Technology LLC Dubai, United Arab Emirates

- Developed large-scale applications such as Dubizzle and TikTok Coins from scratch using React and TypeScript.
- Led the frontend team as a Component Lead and established reusable component standards across applications.
- Designed scalable frontend architectures using Component-Based Architecture and modular development practices.
- Implemented reusable UI components, state management, API integrations, and performance optimizations.
- Integrated REST APIs, GraphQL, and Strapi CMS for scalable application development.
- Implemented CI/CD pipelines and build automation to streamline frontend development and deployment workflows.

Senior Frontend Engineer Feb '23 — Sep '24
Super Future Technology Dubai, United Arab Emirates

- Developed scalable crypto wallet applications using React.js, TypeScript, Umi.js, Next.js, and Ant Design.
- Implemented wallet workflows for binding, transactions, authentication, and asset management via REST APIs.
- Built responsive dashboards and data visualization interfaces using Vue.js and ECharts for monitoring and reporting.
- Integrated Strapi CMS and Firebase Authentication with Google and Facebook providers for secure workflows.
- Implemented Jest unit testing, internationalization, and reusable component architecture for reliability and maintainability.
- Collaborated with UI/UX, backend, QA, and product teams using ClickUp to coordinate Agile workflows and deliver production features.

Senior Frontend Developer Jan '22 — Feb '23
Acksession Tampa, Florida, USA

- Led feature development for enterprise web applications, improving functionality, scalability, and user experience.
- Managed development workflows, conducted code reviews, and provided engineering support to team members.
- Maintained scalable, production-ready codebases, improving application stability and maintainability.

Senior Frontend Developer Jan '19 — Jan '22
Microtech Solutions Beirut, Lebanon

- Designed and developed responsive web applications using Next.js, React, and Ant Design, delivering scalable interfaces across donation and service provider platforms.
- Optimized application architecture and reusable components for performance, maintainability, and reliability.

EDUCATION

Bachelor in Computer Science, American University of Culture & Education (GPA: 3) Sep '14 — Jun '18
Beirut, Lebanon

- Served as Assistant to the President of the Faculty of Computer Science for 2 years.
